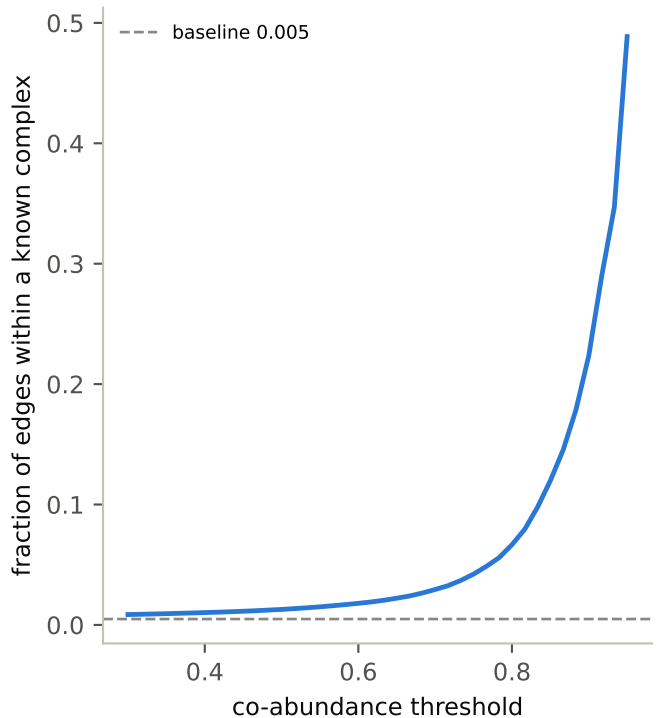
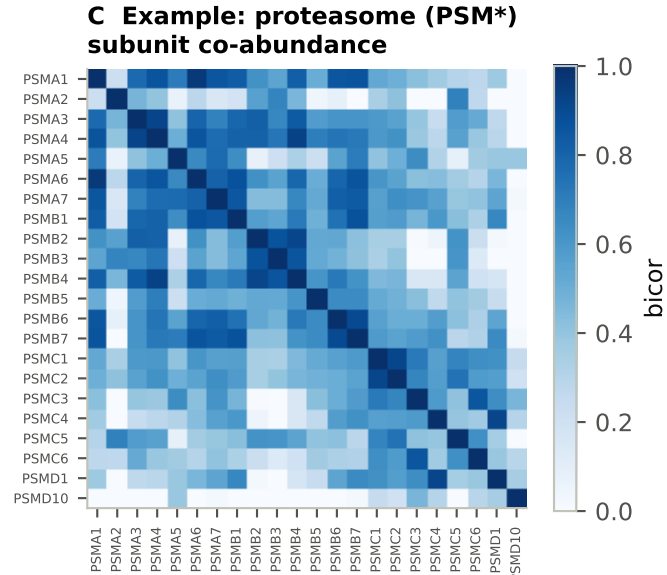
A Co-abundance recovers complexes
AUC = 0.61 (n=39,154 vs 119,410 pairs)
random pairs
same GO-CC complex
density
co-abundance (biweight midcorr, 14 lines)



B High co-abundance enriches for
known complex pairs
baseline 0.005
fraction of edges within a known complex
co-abundance threshold



C Example: proteasome (PSM*)
subunit co-abundance
